## Pressure Injuries Healing Patch

### Pressure Injuries

### AMA Therapy Patch

**Pressure Injuries**, called pressure ulcers, decubitus ulcers, and bedsores – are skin injuries that develop on skin that covers bony areas of the body, such as the heels, ankles, hips and tailbone. Individuals that are at risk of developing pressure injuries are those with medical conditions that limit their ability to change positions. Pressure injuries require a multidisciplinary approach. If your pressure injury is not healing, **Do not delay; Contact Us**

**AMA Therapy Patch has 90%+ healing success rate**

***Wounds Don't Wait !***
