Diabetic Foot Ulcers

AMA Therapy

Diabetic Foot Ulcers (DFU) are one of the most common diabetes complications, and if not adequately treated, they may lead to amputation. **Every 20 seconds**, a limb is amputated somewhere in the world due to diabetes. Therefore, it is vital to recognize and treat diabetic foot ulcers on time and exercise a multidisciplinary approach. If you feel your diabetic foot ulcer is not healing correctly, **Do not delay; AMA Therapy patch has 90%+ healing success rate.** Contact Us.
